PROFILE

Analytical Digital Health student with strong quantitative skills, research experience, and a passion for solving complex business problems in healthcare. Experienced in structuring data, conducting analysis, and communicating insights clearly to diverse stakeholders. Eager to apply analytical thinking and strategic problem-solving to support commercial strategy, pricing, and growth projects in the healthcare and life sciences sector.

EDUCATION

2026 - Present (exp. 2028) Centennial College
Digital Health / Health Informatics

2019 - 2023 University of Toronto Scarborough
Bachelor of Science, Biological Sciences

LIFE SCIENCE FOCUS

- Coursework in digital health, health informatics, biological sciences
- Interest in commercial strategy, pricing, and innovation in healthcare
- Understanding of healthcare operations, data workflows, and patient-centric technology

PROFESSIONAL EXPERIENCE

JAN 2026 - PRESENT

Best Buy Canada | Toronto, ON
Product Process Specialist

- Executed merchandising strategies by maintaining planograms, organizing inventory, and ensuring accurate product placement.
- Supported store operations by monitoring stock levels, addressing discrepancies, and coordinating with supervisors.
- Provided reliable part-time support while completing Digital Health studies.

JUN 2023 - JAN 2026

Best Buy Canada | Toronto, ON
Senior Product Process Specialist

- Led daily product process operations, coordinating merchandising activities, inventory flow, and planogram execution across multiple departments.
- Oversaw and trained team members on merchandising standards, safety procedures, and operational best practices.
- Analyzed stock discrepancies and operational bottlenecks, collaborating with supervisors to implement process improvements.

ACADEMIC RESEARCH EXPERIENCE

JAN 2026 - PRESENT

Digital Health Research Projects
Centennial College

- Conducted structured research across Digital Health courses, analyzing healthcare system challenges, patient-flow inefficiencies, and technology adoption barriers.
- Completed evidence-based assignments involving literature reviews, data interpretation, and evaluation of digital health interventions such as EMRs, telehealth platforms, and clinical decision-support tools.
- Evaluated digital health workflows and identified inefficiencies in patient-flow processes.

SEPT 2017 - JUN 2023

Undergraduate Research Member
University of Toronto Scarborough

- Conducted quantitative and qualitative research supporting biological science investigations.
- Synthesized complex scientific findings into clear summaries for presentations and reports.
- Collaborated with faculty and student researchers to design experiments and interpret results.
